Dejavu ice tools

Dejavu Drytooling specialized axe , with two short picks model and two thin and thick cheeks model, is one of the lightest axes in the world and an excellent option for professional racers.

The new picks of this axe with the special design of the bottom teeth make the axe stable on the side holds.

Also, the new shape of the tip of the picks and the center of gravity of the axe makes it very balanced on the wall and has less wear on metal holds and hard stones.

Due to its special shape, it brings climbers center of gravity closer to the wall to maintain better balance.

This ax has a handle made of light foam and by being placed under the grip of the axe , it makes it easy to place the hand when climbing.

material : Aluminum - Steel - Foam

full weight(light) : 465 gram (**body** : 355 grams)

full weight (normal) : 510 grams

Psycho tools

The Psycho axe is the latest in the Universe series, an excellent choice for competitions and challenging ascents (training in the gym and nature). It has interesting changes compared to previous models. The change in the profile of the tubes has made it much better in the hand and in addition to preventing the axe from spinning in the hand, it requires a thinner grip to thicken the handle. Due to the design and lightness, it has a thicker body and handle and is more comfortable to use, especially for men.

material : Aluminum - Steel

full weight : 585 grams (body : 470 grams)
